About This Game

Vitrum is a 3D, first person, puzzle/platform game. The main character is an android designed to convert energy from crystals into powers. The android can absorb energy in each of his hands, allowing him to combine different powers. One of the coolest powers is the ability to invert the gravity, because it's 3d and because the player can freely choose when and where to use it! Vitrum takes place in a desert laboratory full of different colored crystals. Some crystals grant powers, others are harmful to the android.

The player will have to figure out how to use the crystals, solve the puzzles and finish each stage in Vitrum. Features:

- Stage editor - More than 45 stages.

- Collect crystal shards to unlock Insane stages.
- Each crystal color represents a power, explore each color and discover every power the android can execute.
 - Combine powers to solve more difficult puzzles.
 - Explore 3D gravity inversion, materialization of crystal platforms, super high jumps and other powers.

Title: Vitrum

Genre: Action, Casual, Indie

Developer:

9heads Game Studios

Got it to work no problem. The puzzles really work out well. It took just a right amount of time without being WAY too difficult. I've done several Escape rooms and this one was fun. Got it while it was on sale. Don't regret it at all.. First 5 minutes of the game: JOJO's REFERENCE. $10^2/10$

. No, it is nothing like Jungle Strike.. Rogue Contracts Syndicate is an average game I have seen some people call it a hotline miami clone but i dont think thats fair to say. hotline miami is a fast paced run and gun shooter and Rogue Contracts is a slower more strategic game with some basic stealth elements thrown in. you do a fair amount of running and gunning but most of the time you will be using your fists and sword. i enjoyed the game but it has a few problems with the difficulty for the most part its a fair challenge but some sections feel cheap. it tells an interesting story and has good music and graphics for 1\$ its kinda hard not to recommend. 3/10

Another really dull wave shooter. Graphics are nice, but I can't find anything to recommend here.. Just like my japanese anime

Needs more hentai

10/10

Edit: Okay, because only 10 out of 66 people found this useful, let me just say that this game is absolutely amazing, if you can stand how weird and sometimes difficult it is. I personally love the fact that you can actually become things that you origionally feared when you first start playing. Killing Barracudas as a Great White Shark always has a slight satisfaction of revenge. I strongly would advise, however, that this game needs to be updated a lot. Not that I'm saying "OH THIS GAME IS BROKEN! DONT GET IT" Quite the opposite. I'd reccomend getting it now to show the devs of the game you are excited to play this game when it reaches its full potential. Anyways, sorry for those looking for laughs cause that was a bit boring and I know I got a few of my millions of lost brain cells back from actually trying to be somewhat intelligent.. Best game 2k69 9/11. -IGN 69 Stars -PlumBam **V*V** -sos. Lovely game!

As a point-and-click admirer, and a long-running gamer when it comes to the genre, I am always looking for good titles to enjoy. Most of the times, the games claim to be oh-so-great, but end-up being oh-so-abysmal.

Maggie's Apartment is exactly the opposite - the game makers claim ot have created a fun small game. And that's exactly what they did.

I am not sure the topic or the plot would be as enjoyable for the male audience as it would be for the female, but come on - who hasn't had a near-stupid crush on a celebrity?

The game is fun and full of puns and jokes. Exactly what the trailer suggests. 3-4 hours filled with loveliness. Not to mention the way Maggie moves around. I adore the way she looks. Such a cute thing!

Another skin pack for FortressCraft. Why not?

it's kinda a scam. DON'T BUY. The gameplay is your usual 2D mining RPG, with a couple of fun twists and distinct progression paths. The setting mixes Realm of the Elderlings, War of the Worlds and Lost.. Excellent first VR experience.. Does this remind anybody else of the graphics for Pixel Dungeon?

Game is barely a YES.... The game is in it's infancy stage - so early that you could honestly call it the embryonic stage - and it shows in the gameplay. HOWEVER, despite it's relatively low budget, I am surprised with the game's features and content. It's not Madden (it doesn't have millions of dollars behind it, so of course it won't be) but I think with continued support, 5-10 years down the line, this game could be the PC football game we've all been waiting for. It's not worth \$20 atm (more like \$12 tbh), but if that's what it takes to support the game's future, I'm willing to dish that out (though I bought it for sale at \$15.99, hehe). I definitely recommend it, especially if it's on sale. The PC platform DESPERATELY needs a football game, and we may have it here.. It's worth playing if you got it in the SS complete pack
