THE MARVELOUS MOZAMBIQUE

The Mozambique is a dance and rhythm created by the great Cuban folklorist, Pedro Izquierdo (Pello El Afrokan) around 1962. It is strongly influenced by the Cuban *carnaval* choreography and rhythm known as *Conga de Comparsa* and made its debut at Havana's annual *carnaval* celebration. It was quickly adopted by most Cuban dance bands and despite being initially blacklisted and labeled a Communist rhythm by anti-Castro forces outside Cuba, the infectious Mozambique soon won the affection of loyal musicians, dancers and fans all over the world. With over three decades of development the Mozambique rhythm and its endless variations have come to form an important element of fundamental Afro-Latin music.

The three examples included here are among my favorite Mozambique exercises. Practice and experiment with them at all tempos. **Example #1** is for timbales. The bell is played with the stick held in the right hand while the left stick plays both open and muffled tones on the the lower pitched of the the two timbales. The muffled tone is obtained by pressing into the head. With a little imagination, this exercise can easily be applied to the drumset in several creative ways.

EXAMPLE #1 -Timbales

L.H. open & muff: Bottom line is open; 2nd line is a muff

KEY TO CONGA SYMBOLS

B = bass tone H = heel (palm) T = toe, touch or tap (fingertips) O = open tone S = slap

Example # 2 is for one conga drum. The notes enclosed in parentheses are optional. Practice the rhythm with and without them.

After all, it must have been something beyond our understanding until now. After all, in a lot of places there were only three things that had appeared in existence out of nothing.. Makita: It was an event that happened in the past as well. It was a story about two guys in front of the school, who were separated because one had become the headmaster to the other and thus he had been replaced by a new leader. The two of them had their lives changed once and they had been separated for almost ten years.. Aoi: Oh really?! Makita: It was an event that happened thousands of years ago, but it has been lost for about 3 or 4 years now. In fact, all of mankind had never heard of the other side of things until the end of the present century. And there weren't many people in the world left around then that knew about it.. Makita: Actually, in the long arc to what I believe is a great big big present that people still aren't understanding, the story is about a man who is in charge of a town and his family is in trouble on account of the fact if they want to help the people that have been orphaned from the war or.. Kurigokku: What did it look like? Makita: It was not anything at all like the present. You could say it as one of the four things of a hundred years ago.. Aoi: Haaaa! That is such a shocking claim! Such a simple concept. But...it sounds quite convincing. So is this the thing of a hundred years ago that appeared out of nothing as a result of its past existence. 44ad931eb4 [Bommarillu Hindi Dubbed Watch Online](#)
